Mr. Hubert has made an excellent observation which I am bringing to your attention. The eye witnesses to the Zapruder shooting have claimed that Oswald leaned against the door of Zapruder's car and spoke through the open window. Yet the photos of Zapruder's car at the scene of his murder seem to show the window closed. Only the small vent window is open (See Service Control No. 447, Comm. Rec. No. 87). Do any of you have information as to whether someone closed this window prior to the taking of photographs?
